

1. Similarities: All the print statements and constant variable declaration were the same format.

Differences: Some of us separated the numerator and denominator into separate variables and divided them, while others did all the calculations in one line.

2.

| | Milan | Alessandro | AJ | Isaac |
|-----------------|-------|------------|----|-------|
| Creating UDFs | 5 | 5 | 2 | 3 |
| Nested conds. | 5 | 5 | 4 | 4 |
| Return from UDF | 5 | 5 | 4 | 3 |

3. We submitted Milan's code because it was concise and easy to read.
